

Pension Fund Risk Grading and Charges at a Glance

If you are invested in a fund which is not included in this guide, please refer to www.pru.co.uk for more information.

Pension Fund/Category	Annual Management Charge % Series A funds applicable to: Prudential Premier Plans and Ex-Scottish Amicable Series A (apart from post 01/2003 TIP Series A) & Premier Plans
Minimal Risk These funds may invest in a combination of deposits, money market instruments and other types of interest bearing securities.	
Prudential Cash Pension Fund	1.00
Lower Risk These funds may invest in fixed interest securities including gilts, index-linked and an element of corporate bonds. These types of investment are generally recognised as lower risk.	
Prudential 95% Safeguard Pension Fund	1.00
Prudential Fixed Interest Pension Fund	1.00
Prudential M&G Gilt and Fixed Interest Income Pension Fund+	1.25
Lower to Medium Risk Some of these funds invest in fixed interest securities, predominantly corporate bonds, with higher yielding corporate bonds placed towards the top end of this range as they carry higher default risk. The other funds in this category invest in a wide range of assets which help to provide risk diversification.	
Prudential Cautious UK Managed Pension Fund	1.00
Prudential Corporate Bond Pension Fund	1.00
Prudential Invesco Perpetual Corporate Bond Pension Fund+**	1.65

Prudential North American Pension Fund	1.00
Prudential Old Mutual Japanese Select Pension Fund+**	1.75
Prudential Pacific Markets Pension Fund	1.00
Prudential Small Companies Pension Fund	1.00

- + These funds invest directly in to the fund manager's own range of underlying funds or collective investment schemes.
- ++ These are Prudential funds managed on our behalf by the fund management group stated. They should not be confused with the same or similar named funds or unit trusts offered independently by these fund management groups.

- * The Annual Management Charge of this fund is already taken into account when we calculate the bonus rates for our With-Profits Funds. For further details of the charges for this fund please refer to your Key Features document.
- ** These funds are available for Series A and Premier Priced Individual and Group Personal Pensions.

The Annual Management Charge for these funds is taken by monthly cancellation of units from each investment.

For Premier Pensions the amounts quoted are the basic Annual Management Charges, shown as a percentage of the daily unit price. The actual Annual Management Charge applicable depends on the contribution size and the level of commission selected.

For Premier Stakeholder Pensions and Premier Group Stakeholder there is currently a maximum charge of 1%. This means that some funds may be unavailable for these contracts (depending on contribution size and level of commission selected).

Where the funds invest in underlying Unit Trusts or OEICs, additional expenses may be incurred. These are typically in the region of 0.00% to 0.25% every year, but can be more or less than this. It is our current practice to rebate these additional charges for Series A and Premier Plans.

Important Information

These risk rating categories have been developed by Prudential to help provide an indication of the potential level of risk and reward that is attributable to a fund based on the type of assets which may be held within the fund. Other companies may use different descriptions and as such these risk rating categories should not be considered as generic to the fund management industry.

Prudential will keep the risk rating categories under regular review and as such they may be subject to change in the future. We recommend therefore that before making any fund choice in the future you ensure you understand the appropriate risk rating before making a decision. You will find this information in our Fund Guides, along with further information, at www.pru.co.uk. You should also consider discussing your decision with your adviser.

The information included in this guide is correct as at March 2010.

For pension investment, it is important to take into account the perceived fund risk that suits each individual life stage. Different risk profiles may be appropriate at different stages of the investment.

You should also consider that the effect of inflation may reduce what you could buy in the future with your pension. If inflation is particularly high it could cancel out returns that you make on your pension investment.

For any fund, there may be a delay in buying, selling or switching of units. These delays will only apply in exceptional circumstances and if this applies to you we will let you know. For more information please refer to your Technical Guide.

To help, you may wish to speak to a financial adviser.

How funds invest

Some of the Prudential funds listed in this guide may gain all or part of their investment exposure by investing in collective investment vehicles (e.g. Unit Trusts, Open Ended Investment Companies (OEICs)), derivatives or other investment vehicles, for which the aims and underlying assets are consistent with the objectives of the fund. These Prudential funds may hold an element of cash due to the short delay between new investments being

received by the Prudential fund and being placed in the underlying investment(s), and this may have an impact on the performance of the Prudential fund when compared to the underlying investment(s).

For the funds which can invest in overseas stocks or shares, not all the assets will be denominated in sterling and the value of each of the funds could therefore be affected by prevailing exchange rates. If the taxation treatment of the funds changes, we reserve the right to change the arrangements for the investment of the underlying assets of the fund. Under special circumstances we reserve the right to delay any switch, withdrawal or encashment of units in any of the investment-linked funds for up to one month (longer for funds invested in property – see property pension fund section).

The value of your investment or fund may go down as well as up and the fund value at retirement may be less than the contributions you have made.

Charges may vary in future.

With-Profits Fund

This fund aims to protect investors against some of the ups and downs of investment performance using "smoothing" mechanisms. Please refer to your Key Features document for more information.

Property Pension Fund

You should look upon an investment in property as being long term. There are large costs when we buy and sell property. The allowance for these costs amongst other factors can lead to short-term falls in the price of units in the Property Fund. The value of property is generally a matter of a valuer's opinion rather than fact.

Further information

You can access all Prudential fund prices, fact sheets and performance information on www.pru.co.uk.
