

PruFund Expected Growth Rates

The tables below show the Expected Growth Rates (EGRs) for our range of PruFunds from 28 May 2019 to 26 August 2019. The EGRs are shown gross of investment, product and advice charges. These charges will reduce the EGRs shown below. For more information on charges, please speak to your financial adviser.

Prudential Investment Plan

PruFund Protected Growth Fund/PruFund Growth Fund	5.1%
PruFund Protected Cautious Fund/PruFund Cautious Fund	4.5%
PruFund Risk Managed 1 Fund	4.1%

PruFund Protected Cautious (Euro) Fund/PruFund Cautious (Euro) Fund	4.8%
PruFund Protected Cautious (US Dollar) Fund/PruFund Cautious (US Dollar) Fund	6.0%

PruFund funds aim to grow your money while giving you a smoothed investment experience. They do this by investing in Prudential's With-Profits Fund. The PruFund funds have an established smoothing process which aims to provide you with some protection from the extreme short-terms ups and downs of the markets.

As part of the smoothing process, Prudential set Expected Growth Rates (EGR); these are the annualised rates your investment would normally change in line with. The Expected Growth Rates (EGRs) reflect our view of how we think each PruFund fund will perform over the long term (up to 15 years).

Each PruFund fund has its own EGR and your investments into a PruFund will normally change on a daily basis in line with the relevant EGR. Although we take a long term view, we do review the rates every three months to allow for any changes, which may mean a change in EGR on a quarterly basis, up or down.

We publish Expected Growth Rates on pru.co.uk/investments/investment-fund-range/prufund-range/

The PruFund quarter dates are 25 February, 25 May, 25 August and 25 November (or the next working day if a quarter date is a weekend or a public holiday).

Although we use a long-term view of performance to set EGRs, we also have to take into account shorter term performance. On a daily basis, if the shorter term performance differs too much from our current EGR, we would have to amend the value of your fund up or down to ensure we are not returning too much or too little. We call these Unit Price Adjustments.

We may decide to reset the unit price of a PruFund fund to the unsmoothed price on a particular day, to protect the With-Profits Fund.

There may be occasions where we have to suspend the smoothing process for one or more PruFund Funds for a period of consecutive days.

For more information on EGRs, Unit Price Adjustments, Unit Price Resets, the PruFund smoothing process or suspension of the PruFund smoothing process, refer to the documents below which are available from pru.co.uk or from your financial adviser.

Details of the charges that apply for the range of PruFunds are available from pru.co.uk/funds/guides or from your financial adviser.

The value of an investment is not guaranteed and can go down as well as up. You could get back less than you have paid in.

For the range of PruFund funds, what you receive will depend on the value of the underlying investments, the Expected Growth Rates as set by the Prudential Directors, our charges, the smoothing process, if there is a guarantee and when you take your money out. For more details on PruFund Expected Growth Rates, speak to your Financial Adviser.
